How to use the Throw Ratio (T/W) column. If your screen size does not appear on this chart, use the T/W column to find the lens you need.

Divide the Throw distance by the screen Width to get your "target T/W number". Then, look for a lens with a T/W range that covers it.

These tables are a simulation. They are the result of averaging and rounding.

Lens performance is actually not linear, and non-mathematical: variations in behavior do occur.

**Calculations are from the front glass of the lens and accurate to approximately +/- 3%.
Specifications are subject to change without notice.**
